

DH-HY-FSG010-00

Built-in Dust Filter

- Adopt the medium and low-efficiency filter materials with a special layered structure to filter out small particles of floating dust and water vapor, and prolong the service life of the detection chamber
- Clip-type design, easy to remove and install
- Large dust adsorption capacity and long service life
- Compatible with Wisualarm/Dahua ASD equipment

System Overview

The Built-in Dust Filter is a part of the Aspirating Smoke Detector that installed in front of the chamber. It aims to filter the dust particles efficiently, and ensures that the smoke particles pass through the filter smoothly and reach the detection chamber. The service life of the filter can be intelligently monitored, and the clip-type design is easy to replace.

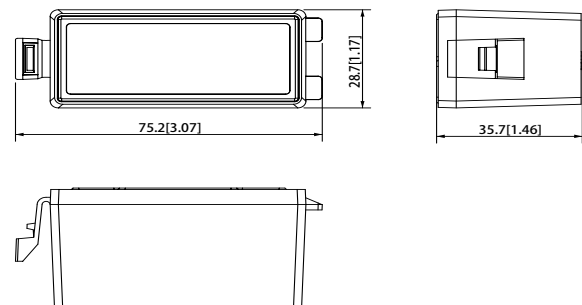

Technical Specification

Color	Black
Material	PC
Dimension	75.2 mm × 28.7 mm × 35.7 mm (2.96" × 1.13" × 1.41")
Weight	0.025 kg (0.06 lb)

Scene

The filter is compatible with Wisualarm/Dahua ASD equipment. It needs to be replaced with new one when the service life of original one in the ASD expires.
